PROFESSIONAL SUMMARY

Senior Data & Backend Engineer with 7+ years of experience architecting high-throughput data pipelines, distributed cloud platforms, and scalable APIs. Expert in the Python ecosystem (Django, FastAPI) and real-time data orchestration (Kafka, Apache Airflow, AWS). Skilled in AI-assisted engineering with GitHub Copilot, Kiro, and Cursor, using them to automate scraper development, debug pipelines, and cut development and debugging time. Proven track record of automating complex ETL/ELT workflows, deploying production-grade machine learning models (AWS SageMaker), and delivering resilient, low-latency analytics infrastructure for enterprise applications.

TECHNICAL SKILLS

- **Languages & Backend:** Python, FastAPI, Django, Flask, RESTful APIs, Microservices Architecture, Event-Driven Architecture, Distributed Systems, Asynchronous Programming, System Design
- **Data Engineering & Streaming:** Apache Kafka, Apache Airflow, ETL/ELT, Data Pipelines, Databricks, Snowflake, Hadoop, pandas, NumPy, Web Scraping
- **AI & LLM Engineering:** Generative AI, LLMs, LangChain, LangGraph, Agentic AI, RAG, Prompt Engineering, Vector Search & Embeddings, ChromaDB, Pinecone, FAISS, AWS Bedrock, AWS SageMaker, Intelligent Document Processing (OCR)
- **Cloud & DevOps**: AWS (EC2, S3, SNS, SQS, Lambda, API Gateway, Textract, Bedrock, SageMaker, CloudWatch), Google Cloud Platform, Docker, Kubernetes, Jenkins, CI/CD
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis, NoSQL, Data Modeling, Query Optimization
- **Frontend & Integrations:** React.js, Next.js, Google Analytics API, Google Search Console, Adobe Analytics
- **Engineering Practices & Tools:** Agile/Scrum, Technical Leadership, Code Reviews, Sprint Planning, GitHub Copilot, Cursor, Kiro, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Wood Mackenzie Gurugram, Haryana, India
Senior Engineer September 2024 – Present

- Led end-to-end delivery of data-intensive backend products for a cross-functional team, owning sprint planning, technical design, and code reviews (Agile/Scrum).
- Architected scalable data platforms and microservices using Python, FastAPI, and Apache Kafka, powering analytics for researchers and business stakeholders.
- Built and maintained 50+ production data pipelines (Python, FastAPI, Kafka) forming the organization's core data infrastructure and supplying training data for ML models; added CloudWatch-based monitoring and alerting to improve uptime and maintainability.
- Engineered an asynchronous GenAI document-processing platform using AWS Textract (OCR), AWS Bedrock, LangChain, and S3 to extract structured entities, property definitions, and summary metrics from large PDF batches.
- Developed an internal web platform (React.js, FastAPI) enabling researchers to configure, run, and monitor scalable web-scraping pipelines without engineering support.
- Introduced AI-assisted development workflows (GitHub Copilot, Cursor, Kiro) to automate scraper development and debugging, cutting development time ~40% and debugging time ~50%
- Converted complex multi-sheet Excel logic from researchers into production-grade ETL pipelines, using AI tooling to trace cross-sheet dependencies.

Mindfire Solutions Noida, Uttar Pradesh, India
Senior Software Engineer March 2022 – September 2024

- Architected scalable data collection systems by integrating Google Analytics, Google Search Console, and Adobe Analytics APIs, improving SEO analytics accuracy by 30%+.
- Engineered production-grade ETL pipelines for complex, multi-source data ingestion, ensuring high-fidelity transformation and loading with resilient error-handling and automated monitoring.
- Partnered with cross-functional stakeholders, successfully translating complex business requirements into scalable technical architectures that drove SEO optimization strategies.
- Strengthened system reliability by deploying proactive monitoring and alerting frameworks, significantly reducing pipeline failures and ensuring continuous data availability.

DJT Corporation & Investments Pvt. Ltd. Noida, Uttar Pradesh, India
Software Developer August 2021 – March 2022

- ➢ Architected a real-time event streaming infrastructure using Apache Kafka, successfully decoupling payment, order, and inventory microservices to enhance system responsiveness and fault tolerance.
- ➢ Designed and deployed robust RESTful APIs utilizing Django REST Framework (DRF) and MongoDB, establishing a highly scalable backend data layer for complex inventory management systems.
- ➢ Managed cloud deployment and traffic routing by configuring Nginx Ingress Controllers for API Gateway management, ensuring secure and highly available application hosting across AWS EC2 ,S3.
- ➢ Drove the end-to-end development of core e-commerce features within an Agile environment, upholding stringent code quality standards and ensuring consistent, on-time delivery of critical platform updates.

Moxtain Noida, Uttar Pradesh, India
Software Developer August 2019 – August 2021

- ➢ Architected a secure, multi-tenant SaaS platform for B2B clients, engineering isolated data environments to ensure strict privacy and deliver personalized user experiences.
- ➢ Developed a comprehensive full-stack admin console leveraging Python, Django, and React.js, implementing robust Role-Based Access Control (RBAC) for secure platform management and operations.
- ➢ Engineered highly scalable RESTful APIs utilizing Django REST Framework (DRF), optimizing backend endpoints to reliably support high-traffic enterprise web applications.
- ➢ Spearheaded the end-to-end development of a modern web application using Next.js and Bootstrap, seamlessly integrating Single Sign-On (SSO) authentication via Google and Facebook OAuth.
- ➢ Integrated robust, frictionless payment processing utilizing Instamojo, enabling diverse payment methods while maintaining strict transaction security and reliability.

EDUCATION

Galgotias University 2012 – 2016
Bachelor of Technology with 8.59 CGPA

CERTIFICATIONS

AWS for Developers (SNS, SQS, SWF) | Learning Apache Airflow | DevOps Fundamentals | Learning Jenkins | MySQL Database Development Mastery
